

FSK-VTE-001

GEKO Venous Thromboembolism (VTE) Prevention Study

NOV2023 NEWSLETTER

WELCOME

Welcome to our first issue of the GEKO VTE Prevention Study Newsletter!

These newsletters will be sent periodically to keep the teams up to date about the latest achievements, trial related activities and study progress/updates.

Royal United Hospital, Bath

Fairfield General Hospital, Bury

Whiston Hospital, Liverpool

Thank you for being our **FIRST 3 study sites OPEN!**
We are happy to be working with you on this exciting project!

Upcoming Study Sites in Setup: West Suffolk Hospital, Northwick Park Hospital, Royal Stoke Hospital, Countess of Chester Hospital, Queen Elizabeth Hospital Birmingham and Moseley Hall Hospital Birmingham, Queen's Medical Centre, Salford Royal Hospital, Addenbrookes Hospital, Royal Bournemouth Hospital

RECRUITMENT

7 / 1200 participants enrolled

FIRST PATIENT ENROLLED IN THE STUDY: 06 Jul 2023, Royal United Hospital

MOST RECENT ENROLMENT: 07 Nov 2023, Fairfield General Hospital

Issues with enrolment—Main eligibility criteria preventing enrolment into this study are:

1. Patients independently mobile
2. Window for enrolment
3. Non-stroke

Please keep on screening for new patient participants!

NEWSFLASH!

Royal United Hospital spotlighted their involvement in the GEKO Study for World Stroke Day! (29 Oct 2023)

See a lovely photo of the Research Team in the press release below!
