

FSK-VTE-001

# GEKO Venous Thromboembolism (VTE) Prevention Study

## AUG 2024 NEWSLETTER

### RECRUITMENT

**98 / 1200** participants enrolled

**MOST RECENT ENROLMENTS:** Countess of Chester Hospital,  
enrolled **2** participants on **30 Aug 2024!**

A big **THANK YOU** to all sites who found eligible participants in the month of August (despite the summer holidays!) — a record **20 study participants** were recruited this month!

Royal Stoke University Hospital are still forging ahead with a grand total of **31 participants** enrolled!

Special mention this month go to Fairfield General Hospital and Countess of Chester Hospital who helped enrol **3 participants** each in August!

As we sent out earlier in the week, we are **SUPER** close to achieving our first major study milestone of 100 study participants!

**WILL YOUR SITE BE THE ONE TO ENROL THE 100<sup>TH</sup>?**

As always, a **HUGE** thank you to all study sites for their continuing efforts.  
**Please do keep on screening for new patient study participants!**

### Reminder on Study Procedures!

> Day 90

**90 Days** +/- 2 weeks

- **90 day questionnaire**

First section: data can be collected from medical notes and verified with patient.  
Second section: Patient specific questions e.g. Leg pain, skin breaks on leg etc.

- EQ-5D
- mRS Telephone version
- VEINES-QOL and Symptom Score
- AEs\*

\* Note safety surveillance starts as soon as patient enrolled

- Scripts for all **90 day** forms are available via the worksheets. (Please let us know if you need copies - current versions should be filed in the ISF).
- If you are unable to contact the study participant, the first part of the **90 day** questionnaire should still be possible to complete via medical notes.
